

FALL BACK

SET YOUR CLOCKS BACK ONE HOUR ON NOVEMBER 4, 2016

Check your Smoke Alarms & Carbon Monoxide Detectors when you change the clocks!

Most fatal fires occur at night. Every home needs working smoke alarms to provide an early warning. Install smoke alarms in all sleeping rooms, hallways that lead to sleeping areas, basements and each additional level of your home. Smoke alarms should be mounted on the ceiling 4" from the wall; wall mounts should be 4-12" from the ceiling. Do not install near draft areas (windows, vents.). Call your local fire department if you are unsure about placement. Prepare and practice an escape plan! Crawl low under smoke. Plan where to meet outside. Once you're out, Stay out! Remember, almost every day a smoke alarm saves somebody's life. **Knudson Lumber carries a variety of smoke and carbon monoxide detectors, along with an assortment of batteries.**
