- Three of every five home fire deaths resulted from fires in homes with no smoke alarms (38%) or no working smoke alarms (21%).
- No smoke alarms were present in almost two out of every five (38%) home fire deaths.
- The death rate per 100 reported home fires was more than twice as high in homes that did not have any working smoke alarms compared to the rate in homes with working smoke alarms (1.18 deaths vs. 0.53 deaths per 100 fires).
- In fires in which the smoke alarms were present but did not operate, almost half (46%) of the smoke alarms had missing or disconnected batteries.
- Dead batteries caused one-quarter (24%) of the smoke alarm failures.

Knudson Lumber has a great selection of smoke and carbon monoxide detectors and batteries.

GRIZZLY PELLET STARTERS — SKU PS50

ONLY \$16.99

A pellet starter is a kiln dried sawdust and high grade paraffin combination pressed into a 3/4 oz. paper cup. Grizzly Pellet Starters are a non-toxic, environmentally safe alternative to the messy and highly toxic accelerant type gels used to ignite pellet stoves. Grizzly pellet starters are safe and easy to use. Just place a few pellets on top of the starter and light the paper edge, let the pellet starter burn for approx. 2 minutes then set your auger.

STAY WARM THIS FALL & WINTER!
